

Lupita's Beauty Salon

Professional Website Solution

Get found, get booked, get trusted — all on one beautiful platform

Stop losing customers to outdated websites. A professional, mobile-first salon website turns curious visitors into booked appointments. This solution does exactly that — and costs less than you'd think to launch.

1

Get Found by Customers

Google Maps optimization, local SEO structured data, and a sitemap that tells search engines about your business. Rank for "hair salon near me" and "salon Anaheim."

2

Lightning-Fast Loading

Loads in **under 3 seconds** on mobile. Users don't wait — they book. Every page is pre-rendered as static HTML, no server delays.

3

Real Bookings in Seconds

Five-step booking flow takes customers from "I'm interested" to confirmed in under a minute. No account creation, no friction. Appointments show in your owner dashboard immediately.

4

Sticky Call & Book on Mobile

On phones, a persistent call/book bar stays at the bottom of the screen. Customers can call or book without scrolling — impulse clicks convert.

5

Bilingual by Default

Full English/Spanish support across every page. Language toggle in the header, auto-detects Spanish browsers. One website, two markets.

6

Professional Design

Luxury beauty aesthetic with custom color palette, hand-picked fonts, and smooth scroll-triggered animations. Looks as good on a phone as on a desktop.

7

Fully Accessible

WCAG-compliant contrast ratios, keyboard navigation, screen reader support, and respects user motion preferences. Reaches every customer, including those with disabilities.

8

Grow Without Limits

Built on Next.js with real database hooks pre-baked. Connect a backend later — add confirmations, reminders, blocked times, team members. No refactor needed.

What's Included
